

iDye Peggable Rack

Rack Assembly Instructions:

1. Place one washer, ball bearing ring and then the other washer onto upright tube on the **lower bracket**.
2. Install lower bracket into pegboard.
3. Place whole rack onto lower bracket.
4. Install upper bracket into pegboard (estimate position).
5. Place one washer, ball bearing ring and then the other washer onto tube on the **upper bracket**. Hold in place.

washer
ball bearing
washer
6. Raise rack up onto upper bracket. Push cotter pin into hole in tube of **upper bracket** UNDER the rack. Use pliers to secure cotter pin.
7. On **lower bracket**, lift washers and ball bearing ring above hole in tube. Push cotter pin into hole in tube of lower bracket, and then use pliers to secure. Settle rack onto lower bracket.
8. Insert header into the tube on the top.
9. Load with re-order tags. Start with any upper left-hand peg, and place the first tag "JID1400." Then, place tags around in numerical order until they are gone.
10. Load the rack with iDye color packets corresponding to the re-order tags.
