

THE FINE ART OF PAINTING ON SILK

By Jan Janas & Diane Tuckman

TO WORK WITH SILK is to develop an intimate relationship with the queen of fibers, to love it, and to feel totally awed by the mystery of it all. When you add colors, you have a magical combination of light with color. That is why silk is such a delight to wear, to look at, and to work with. We are smitten and know you will be too!

This is our fourth book, which was six years in the making and it is finally here! It is both for beginner and expert level artists. It reflects the broad appeal of the fine art of painting on silk with very detailed “how-to” visual instructions.

As is our tradition with our books, we guide you through the visual techniques described. Just open the book in your studio and proceed. This book is a must-have in all silk art studios.

In particular, the **COLOR** chapter by Jan is priceless. Take one week off, do the exercises in sequence, and the **power of your silk work will be changed forever.**

This chapter takes a very different approach from other books, since it is geared to working with silk painting products.

It will lead you to great artistic freedom, creative energy and authenticity in your work from the knowledge acquired.
