

# Quick Start Guide

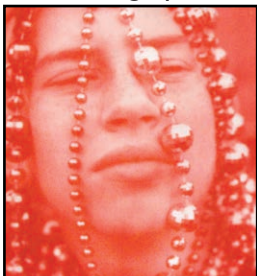

# JACQUARD SOLAR FAST™

Photograms

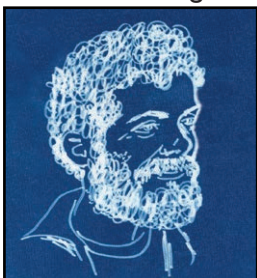

Photographs

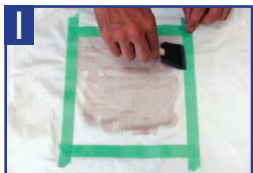

Multi-colored Prints

Hand Drawn Negatives

1 Apply SolarFast to fabric or paper. For hard edges, use masking tape.

2 Blot absorbent paper or fabric with a paper towel to avoid overwetting.

3 Place objects or image on the coated surface. Film negatives should be inkjet-printed on SolarFast Film.

4 Secure your image with glass, binder clips, pins, tape or magnets.

Visit [www.jacquardsolarfast.com](http://www.jacquardsolarfast.com) or scan QR code (right) to turn any image into a negative.

5 Expose the coated paper or fabric to sunlight for 10-20 minutes.

6 Take it inside before revealing your image!

7 Remove the undeveloped dye by washing. Use SolarFast Wash for best results.

**NOW YOU'RE DONE!**  
Prints are soft to the touch, lightfast and washable.

Show us a picture—we'd love to see what you've made!

Post it on our Facebook page

or use the #solarfast hashtag on social media
