Jacquard Safety Data Sheet

Color Intensifier

1. Product and company identification

Product name: Color Intensifier
Material uses: Textile chemical
Chemical family: Aqueous emulsion of organic esters
MSDS #: 00042563
Validation date: 7/30/2015.
Supplier/Manufacturer: Rupert, Gibbon, & Spider Inc
1147 Healdsburg Avenue
Healdsburg CA 95448
Phone: 707-433-9577
service@jacquardproducts.com

In case of emergency: Poison Control 800-222-1222

2. Hazards identification

Physical state: Liquid.
Odor: Sweet.
Color: Amber.

OSHA/HCS status: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Emergency overview: WARNING!

CAUSES EYE IRRITATION. MAY BE HARMFUL IF SWALLOWED.
Do not ingest. Avoid breathing vapor or mist. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.

See toxicological information (Section 11)

GENERAL INFORMATION: Read the entire MSDS for a more thorough evaluation of the hazards.

3. Composition/information on ingredients

</tbody>
</table>

4. First aid measures

Eye contact: Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

Skin contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.
COLOR INTENSIFIER

4. First aid measures

Inhalation: Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

Ingestion: Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Notes to physician: No specific treatment. Treat symptomatically. Call medical doctor or poison control center immediately if large quantities have been ingested.

5. Fire-fighting measures

Flash point: Closed cup: >93°C (>199.4°F) [EC A.9 Flash-Point (closed cup)]

Hazardous thermal decomposition products: Decomposition products may include the following materials:
- carbon dioxide
- carbon monoxide
- nitrogen oxides
- phosphorus oxides

Extinguishing media

Suitable: Use an extinguishing agent suitable for the surrounding fire.

Not suitable: None known.

Special exposure hazards: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

Personal precautions: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

Methods for cleaning up: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.
7. Handling and storage

Handling: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Avoid release to the environment. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Recommended monitoring procedures: If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Engineering measures: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Personal protection: Respiratory: In case of inadequate ventilation wear respiratory protection. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
9. Physical and chemical properties

Appearance
- Physical state: Liquid.
- Color: Amber.
- Odor: Sweet.
- pH: 3 to 5

Boiling/condensation point: 100°C (212°F)
Melting/freezing point: <-40°C (<-40°F)
Flash point: Closed cup: >93°C (>199.4°F) [EC A.9 Flash-Point (closed cup)]
Flammable limits: Not available.
Ignition Temperature (Deg C): SIT > 450 °ASTM-D1929B
Auto-ignition temperature: Not available.

Oxidizing properties: None.
Vapor pressure: Not available.
Specific gravity: Not available.
Water solubility: 50 g/l 25 deg C
Partition coefficient: n-octanol/water (log Kow): Not available.
Viscosity: Dynamic (room temperature): 55 to 85 mPa·s (55 to 85 cP)
Density: 1.07 to 1.08 g/cm³
Vapor density: Not available.
Evaporation rate (butyl acetate = 1): Not available.

10. Stability and reactivity

Chemical stability: The product is stable.
Possibility of hazardous reactions: Under normal conditions of storage and use, hazardous reactions will not occur.
Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.
Conditions to avoid: No specific data.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

**Conclusion/Summary**

**Skin**
- Benzyl benzoate
- Ethanol, 2,2',2''-nitrilotris-, compound with .alpha.- (2,4, 6-tris (2-phenylethenyl) phenyl) -.omega.- hydroxypoly (oxy-1,2-ethanediyl) phosphate
  - No additional information.
  - Non-irritating to the skin.

**Eyes**
- Benzyl benzoate
- Ethanol, 2,2',2''-nitrilotris-, compound with .alpha.- (2,4, 6-tris (2-phenylethenyl) phenyl) -.omega.- hydroxypoly (oxy-1,2-ethanediyl) phosphate
  - No additional information.
  - Irritating to eyes.

**Respiratory**
- Benzyl benzoate
- Ethanol, 2,2',2''-nitrilotris-, compound with .alpha.- (2,4, 6-tris (2-phenylethenyl) phenyl) -.omega.- hydroxypoly (oxy-1,2-ethanediyl) phosphate
  - No additional information.

**Potential acute health effects**

- **Inhalation**: No known significant effects or critical hazards.
- **Ingestion**: Harmful if swallowed.
- **Skin contact**: No known significant effects or critical hazards.
- **Eye contact**: Irritating to eyes.

**Potential chronic health effects**

- **General**: No known significant effects or critical hazards.
- **Target organs**: No known significant effects or critical hazards.
- **Carcinogenicity**: No known significant effects or critical hazards.
- **Mutagenicity**: No known significant effects or critical hazards.
- **Teratogenicity**: No known significant effects or critical hazards.
- **Developmental effects**: No known significant effects or critical hazards.
11. Toxicological information

- **Fertility effects**: No known significant effects or critical hazards.
- **Medical conditions aggravated by over-exposure**: None known.

12. Ecological information

**Environmental effects**: Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Readily biodegradable. Water polluting material. May be harmful to the environment if released in large quantities.

**Aquatic ecotoxicity**

- **Organohalogen content**: 0%

13. Disposal considerations

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

14. Transport information

Proper shipping name:

- **DOT**: Environmentally hazardous substance, liquid, n.o.s. (BENZYL BENZOATE). Marine pollutant
- **TDG**: Environmentally hazardous substance, liquid, n.o.s. (BENZYL BENZOATE). Marine pollutant
- **IMDG**: Environmentally hazardous substance, liquid, n.o.s. (BENZYL BENZOATE). Marine pollutant
- **IATA**: Environmentally hazardous substance, liquid, n.o.s. (BENZYL BENZOATE)

### 15. Regulatory information

**United States**

- **HCS Classification**
- U.S. Federal regulations
- TSCA 8(b) inventory
- TSCA 5(a)2 final significant new use rule (SNUR)
- TSCA 5(e) substance consent order
- TSCA 12(b) export notification
- SARA 311/312
- Clean Air Act Section 112 (b) Hazardous Air Pollutants (HAPs)
- Clean Air Act - Ozone Depleting Substances (ODS)

: Irritating material
: United States inventory (TSCA 8b): All components are listed or exempted.
: All components are listed or exempted.
: No ingredients listed.
: No ingredients listed.
: No ingredients listed.
: Immediate (acute) health hazard
: No ingredients listed.
: No ingredients listed.
: This product does not contain nor is it manufactured with ozone depleting substances.
15. Regulatory information

SARA 313 : No ingredients listed.

CERCLA Hazardous substances : No ingredients listed.

Stateregulations

Pennsylvania - RTK : Dipropylene glycol

California Prop 65 : This product contains no listed substances known to the State of California to cause cancer, birth defects or other reproductive harm, at levels which would require a warning under the statute.

International regulations

Canada

WHMIS (Canada) : Class D-2B: Material causing other toxic effects (Toxic).

CEPA DSL : At least one component is not listed.

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations.

International lists

Australia inventory (AICS) : At least one component is not listed.

China inventory (IECSC) : All components are listed or exempted.

Japan inventory : All components are listed or exempted.

Korea inventory : At least one component is not listed.

Malaysia Inventory (EHS Register) : Not determined.

New Zealand Inventory of Chemicals (NZIoC) : At least one component is not listed.

Philippines inventory (PICCS) : At least one component is not listed.

Taiwan inventory (CSNN) : Not determined.

16. Other information

Label requirements : CAUSES EYE IRRITATION. MAY BE HARMFUL IF SWALLOWED.
