

SWIPE PAINTING

Swipe painting is a somewhat controlled way of painting with fluid paint. Because the fluid paint is being moved quickly across the fabric, it holds its shape better than with splatter painting.

YOU WILL NEED

- Dye-Na-Flow paint
- Foam brush
- Fabric

1. Dip the foam brush into the paint container or pour a small amount of paint into a plastic cup and dip a foam brush into it (*fig. 1*).
2. Swipe the foam brush across the fabric quickly, creating random patterns (*figs. 2-4*).
3. You can also just pounce the foam brush tip on the fabric to create random rectangular shapes.
