

DROP-CLOTH PRINTING

When we talked about setting up a work space, I mentioned the cool random patterns you can get on the fabric that makes up the top layer of your print surface. Well, I'm an impatient artist, so I decided to print fabric that looks like it's been sitting on a print table for ages, picking up leftover paint.

YOU WILL NEED

- Paint (2 or 3 colors)
- Gelli Arts Gel Printing Plate
- Plastic spoons
- Plastic palette knife
- Fabric
