Lumiere 3D in the Clear... and ready for launch!

Introducing Colorless Adhesive & Dimensional Paint

Healdsburg, CA (December 2012) -

Lumiere 3D was conceived as a multi-purpose, hybrid product: the idea was to create a mica-based, dimensional paint that would double as a powerful, multi-surface adhesive. Some thought it was a tall order, but we did it! Lumiere 3D is a totally unique and multifaceted product with unprecedented potential!

The palette of Lumiere 3D is based on our famous line of Lumiere pearlescent/metallic textile paints. Both Lumiere and Lumiere 3D are formulated with Pearl Ex mica pigments, which are so shiny and sparkly they can make even a grown man giddy. These mica pigments are so magical, in fact, that they might even distract you from the amazingly powerful adhesive properties of Lumiere 3D. In order to underscore this paint's unique adhesive power, we have decided to produce a clear, completely colorless Lumiere 3D!

Lumiere 3D #200 Clear may be used as a glue on practically any surface. It is great for attaching beads, jewels, patches or decals to fabric or paper. It also works great on wood, leather, canvas, glass, vinyl, most plastics and even metal. It is terrific for incorporating objects into fine art. Lumiere 3D Clear is also a fantastic adhesive for fabric - washable and dry cleanable after thorough drying. You may also mix powdered pigments into it or use it as an extender for the rest of the Lumiere 3D colors.

Lumiere 3D Clear is now available in open stock, as well as a carded blister with our three sizes of fine liner tips. We are sure that once you experience Lumiere 3D without the distraction of color (so sparkly!), it will become your go-to glue for all applications!

Has there ever been a more universal product?

Lumiere 3D Clear

Available in:
Item JDP1200 - Open stock
1 fl oz/29 ml ▪ \$2.49 MSRP

Item JDP0200 - Carded Blister
